<area> tag, 71

arguments, in PHP, in brackets, 337

- arithmetic operators, 215, 215*t*
- arranging content, 133–161, 177, **178**
 - business partner communication through, 135
 - cascading style sheets (CSS) and, 133
 - customer communication through, 134
 - <div> tag in, 133, 153, 158–161, **158–161**
 - frames in, 153–158. *See* frames
 - purpose of, 134–136
 - resource provision through, 135–136
 - sales leads generation through, 134
 - selling products through, 134
 - tag in, 133, 153, 158–161, **158–161**
 - tables in, 136–153. *See* tables
- array constants, 556*t*
- array functions, 553–555*t*
 - ASP/ASP.NET/VB Script and, 397, 397*t*
- arrays, 255–258, **255**, **256**, 256–257*t*, **257**, **258**
 - ASP/ASP.NET/VB Script and, 390–391, **390**, 397, 397*t*
 - methods for, 256–257, 256–257*t*
 - multidimensional, in PHP, 332–334, **333**, **334**
 - PHP and, 331–334, **332**, **333**, **334**, 335
 - populating (loading), 255–256, **256**
 - sorting, 257–258, **257**, **258**
- AS400, 19
- ASP/ASP.NET and VB Script, 8, 9, 15, 19, 163, 172, 184, 186, 277, 284, 307, 310, 377–433, 435, 535
 - advantages and disadvantages of, 379
 - and/or conditions in, 403–404, **404**
 - array functions in, 397, 397*t*
 - arrays in, 390–391, **390**, 397, 397*t*
 - <body> tag for, 384
 - browser support for, 522
 - call statement in, 391–393, **391**
 - calling a function in, 394, **394**
 - CGI vs., 281–282
 - Common Language Runtime and, 377
 - configuration of, 383–384
 - conversion and formatting functions in, 396, 396*t*
 - C# and, 377
 - date and time functions in, 395*t*
 - dim statement in, 389–390, **389**
 - <div> tags and, 382
 - Do Until loops in, 408–409, **408**, **409**
 - Do While loops in, 407–408, **407**, **408**
 - document.write method in, 385, **385**
 - For Each loops in, 406–407, **407**
 - For Next loops in, 405, **405**, **406**
 - Format function in, 424
 - forms in, 424–428
 - access data source for, 428
 - FormView control in, 424, **425–427**
 - new page in, 428, **428**
 - functions in, built-in, 394–399, 395*t*, 396*t*, 397*t*, 398*t*, 399*t*
 - functions in, defining, 393–399, **393**
 - <head> tag for, 384
 - href property in, 421
 - HTML and, 379–381, **380**
 - HTML controls in, 409, 409–410*t*
 - If statements in, 401–403, **401**, **402**, **403**
 - Internet Information Server (IIS) and, 381
 - Java vs., 378
 - JSP and, 436
 - List Employees table example using, 413–418, **413–418**
 - log-in control, 412, 413*t*
 - loops in, 405–409
 - math functions in, 396, 397*t*
 - message box (MsgBox) in, 386–389, **386**, **387**
 - miscellaneous functions in, 398, 399*t*
 - navigation controls in, 412, 412*t*
 - option explicit statement in, 389–390, **390**
 - PHP vs., 310–311
 - placing VB Script in HTML documents, 399–400, 400*t*
 - processing of, 379–409
 - query strings in, 421
 - response.write method in, 381, **381**
 - <script> tag for, 384, 386, **386**
 - select statements in, 404, **404**, **405**, 424
 - server-side code in, 379
 - servers and, 383–384
 - SQL Server connection in, 433
 - standard controls in, 410, 410–411*t*
 - string functions in, 398, 398*t*
 - subprocedures in, defining, 391–393, **391**, **392**

- tables using, 409–424
 - advanced type, 419–424, **419–424**
 - Format function in, 424
 - href property in, 421
 - HTML controls in, 409, 409–410*t*
 - List Employees table example using, 413–418, **413–418**
 - log-in control, 412, 413*t*
 - navigation controls in, 412, 412*t*
 - SELECT statement in, 424
 - standard controls in, 410, 410–411*t*
 - validation controls in, 411, 411*t*
 - tools for, 381–383
 - updating database data using, 424–432
 - AccessDataSource for, 432, **432**
 - EditTemplate for, 429–430, **430**
 - InsertTemplate for, 430, **430–431**
 - ItemTemplate for, 431, **431**
 - validation controls in, 411, 411*t*
 - variables in, defining, 389–390
 - VB Script code using, 384–389, **385, 386, 387**
 - VB.NET and, 377
 - Visual Web Developer tool for, 381–383
 - wizard for, 381–383, **382**
 - assignment operators, 215, 215*t*
 - asynchronous interactions, browser-based applications and, 17
 - Asynchronous JavaScript and XML. *See* Ajax
 - attributes for elements, 29
 - attributes for table columns tag, 545*t*
 - audience of book, 3–4
 - audience of Web site, browser selection and, 516–517
 - auto property, 109
 - autostart, video, 67
- B**
- tag, 49, **49**
 - background
 - attribute for, 30
 - color, 29, 115
 - fill/repeat, 115–116
 - positioning, 116
 - properties for, 114–116, **115, 116**
 - tables and, 136
 - URL image as, 114
 - backslash (/) continuation character in JavaScript, 211
 - base URL, 545*t*
 - baseline, 109
 - Basic, 284
 - BCD Web Smart, 173
 - beans, JSP and, 460–464, 461*t*, **461, 462*t*, 462, 463**
 - BEF, 19
 - benchmark testing, 181
 - Berners-Lee, Tim, 26, 513
 - best practices, 531–543. *See also* Web site design
 - avoiding cutting edge techniques, 533
