Preface	ix
Our Presentation	x
Acknowledgements	xi

Part I: Overview

Chapter 1: Introduction	3
Modes of Reliance on IT	3
Support Mode	4
Factory Mode	5
Turnaround Mode	5
Strategic Mode	6
IT as a Commodity	6
Software that Fulfills Its Role	7
Software that Enables a Competitive Advantage	8
Web 2.0	8
Service-Oriented Architecture	12
Grow Your Software	15
Agile Development	16
The Importance of Abstraction	
in a Computer Language	18
The Importance of Wide Coverage	
by a Computer Language	25
Accentuate the Negative	25
Are Enterprise Languages Disruptive?	26
Do Enterprise Languages Inhibit Innovation?	26
Do Enterprise Languages Have Flaws	
Caused by Higher Abstraction?	27
Are Enterprise Languages Old News?	28

Chapter 2:	Web 2.0	29
	Interactive Web Sites	29
	Networks	29
	Collaboration	35
	Brand Image	36
	Revenue	37
	Owning and Extending Data	39
	Rich Internet Applications	39
Chapter 3:	Introduction to Web Security	45
	Security Trends	45
	Threats by Type	46
	Security by Location	47
	Data in Transit	47
	Server-Side Security	55
	Client-Side Security	58
	Use of an LDAP-Compliant Server	60
	Security for a Rich Internet Application	60
	Web Servers and Application Servers	61
	Container-Managed Authentication	62
	Security Options	63
	Risk	65
	Assessing Risk	65
	Responding to Risk	66
Chapter 4:	Service-Oriented Architecture	69
	Structure of a Service-Oriented Application	69
	Aspects of a Service	70
	Service Implementation	70
	Elementary Access Details	71
	Contract	71
	Loose Coupling	72
	Service Registry	74
	Service Level Agreement	74
	Web and Binary-Exchange Services	75
	Architectural Styles in Web Services	76

Traditional RPC-Style SOAP Services	77
REST Services	78
REST-RPC Services	79

Part II: Web 2.0 Solutions with EGL

Chapter 5:	EGL Scope	83
	Uses of EGL	83
	Supported Technologies	85
	Runtime Environment	85
	Persistent Data Storage	87
	User Interface	89
	Support for Service-Oriented Architecture	91
	Network Communication	93
	Report Production	93
	Integration with Existing Code	94
	Integrating Multiple Products that Support EGL	95
Chapter 6:	EGL Rich UI in Context	97
	Multiple Tiers	97
	Support for Old and New Programming Models	98
	The DOM Tree	99
	Rich UI Handler	104
	Rich UI Editor	107
	Embedded Handlers	109
	Service access	110
	Use of Libraries	112
	Model, View, ControllerI	112
	MVC in EGL Rich UI	113
	Validating Form	116
	Validators	117
	Form Validation, Commit, and Publish	118
	Defining Displayable Text in an External File	119
	Simulating Page Flow	120

Switching Pages in the Simplest Case	123
Switching Pages and Updating the Address Bar	124
Handler Communication with Infobus	127

Chapter 7: Services and EGL Rich UI	131
CICS Web Services	131
Access of IBM i Programs as Web Services	133
End-to-End Processing	133
EGL Projects and Deployment	134
Example of End-to-End Processing	135
EGL Deployment Descriptor	136
Service Client Bindings	137
Web Service Deployment	137
How Do You Set the Location Data for Service Access? . .	137
Access of SOAP Services	138
Access of EGL REST Services	139
Access of REST Services	139
What is the Location for an EGL-Generated Service?	141

Part III: Programming with EGL

Chapter 8: Overview of Generation	145
EGL Compilation	146
EGL Build	147
EGL Generation	147

Chapter 9: Language Organization	149
Data Types	149
Categories of EGL Data Types	151
Data Item	152
Record Part	153
Dictionary Part	156
Data table	158

Logic Parts	159
Categories of EGL Logic Parts	161
Program Within a Run Unit	161
Library	162
Service	163
Handler	165
Prototype Parts	165
Categories of EGL Prototype Parts	165
Interface Part	166
ExternalType Part	167
Delegate Part	167
User Interface Parts	169
Form Part	169
FormGroup part	170
Annotations	170
Stereotypes	173
Set-Value Blocks	174
Packages	176
Use Statement	179

Chapter 10: Runtime Values	181
Constants	181
Variables	182
Using the New Operator	184
Using a Set-Value Block with a Reference Variable ...	185
Arrays	186
Array Literals	186
Dynamic Arrays	186
Structure-Field Arrays	188
Assigning One Variable to Another	189
Value Variable to a Value Variable	189
Value Variable to a Reference Variable	189
Reference Variable to a Reference Variable	191
Reference Variable to a Value Variable	194
Assigning a Record that Includes a Reference Field ...	196
Adding a Record to an Array of Records	197
Expressions	199

	Name Resolution in Expressions	200
	Assignment and Reference Compatibility	202
	Static and Dynamic Access	202
Chapter 11:	EGL System Resources	207
	EGL Statements	207
	Code Documentation	208
	Data Assignment	209
	Conditional Processing	211
	Loop Control	213
	Transfer of Control Within a Program	214
	Transfer of Control Out of a Program	216
	System Libraries	217
	Exception Handling	218
	Propagation	221
	Exception Fields	222
Chapter 12:	Files and Relational Databases	227
	Logical Unit of Work	227
	Data-Access Statements	228
	File Access	229
	File Names and Resource Associations	230
	Resource Associations Part	230
	ResourceAssociation Field	231
	Escape Character	231
	Support for Relational Databases	232
	Insertion and Retrieval	232
	Implicit and Explicit SQL Statements	233
	Open and ForEach	235
	Dynamic Arrays of SQL Records	237
	Exception Handling	239
Chapter 13:	Reporting	241
	Support for BIRT Reports	241
	Initial Access of the BIRT Report Engine	242

BIRT Handler	243
Support for EGL Text Reporting	245
Chapter 14: JavaServer Faces	251
Introduction to JSF	251
EGL JSF and EGL Rich UI	253
EGL JSF Handler	253
Development Example	255
Generation Outputs	260
Binding a Web-Page Field to a Variable or Function ..	261
EGL JSF in Context	262
Frameworks	263
View	264
JSF Life Cycle	267
Appendix A: Sources of Information	273
EGL	273
MC Press	273
Eclipse and BIRT	274
JavaServer Faces	274
Appendix B: EGL Rich UI Widgets	275
Styles	275
Widget Types by Category	278
Container widgets	279
Common fields	280
Box	280
Div	281
FloatLeft	282
FloatRight	283
Grouping	285
Information widgets	286
Grid	286
HTML	289
Image	290

Shadow	291
Span	292
TextLabel	293
Tree	293
Interactive Widgets	295
BidiTextArea	295
BidiTextField	295
Button	295
CheckBox	296
Combo	297
Hyperlink	298
List	299
ListMulti	299
Menu	301
PasswordTextField	304
RadioGroup	304
TextArea	305
TextField	306
Hover Widgets	307
GridTooltip	307
Tooltip	309
TreeTooltip	311
Fields available in most widgets	312
Endnotes	315
