  maximum transfer unit (MTU) in, 162, 167
  maxperm/minperm in tuning, 162–163, **163**, 165, 169
  memory management in network subsystems and, 141
  monitoring of, 143–156
  mount parameters to tune, 163–164, 168
  name resolution in, 161–162, 168, 169, 182
  netcdctrl daemon and, 182
  netpmon to monitor, 134, 145–146, **146**, 148, 152–153, **152**, **153**, 167
  netstat to monitor, 131, 133, 143–145, **143**, **144**, 154, **154**, 158, **158**, 167, 168
  Network File System (NFS), 131, 136–139, **137**, **138**, 148–153, 167, 169, 183
  nfds in, 137–138
  nfs to monitor, 148
  nfs_rfc1323 in tuning, 164, **164**
  nfs4cl to monitor, 148, 151–152, **152**, 167
  nfsd to tune, 165
  nfso to tune, 164–165, **164**, **165**, 168
  nfsstat to monitor, 148, 149–151, **150**, **151**, 167
  nmon to monitor, 148–149, **148**, 167
  no to tune, 157–161, **157**, **159**, **160**, **161**, 164, **164**, 168, 182
  Object Data Manager (ODM) and ifconfig, 161
  Open Systems Interconnection (OSI) model for networks and, 135, **138**, 167
  packets in, 136, 154–156, 168–169
  portmap and, 139
  protocols in, 141
  protocols used in network and, 135–136, 164
  remote procedure calls (RPCs) in, 137, 149, 163, 167
  rfc1323 parameter in tuning, 159, 164–165, **164**, 164
  rsize and wsize parameters to tune, 163–164
  sb_max parameter in tuning, 159
  server tuning in, 164–165
  speed of, 139–140
  spray to monitor, 148, **148**
  System Management Interface Tool (SMIT), 161
  TCP/IP layers and, 134, **135**, **138**

network I/O, *continued*
tcp_nodedelyack parameter in tuning, 160
tcp_recvspace/tcp_sendspace parameters in tuning, 158, 164, **164**, 168
tcpdump to monitor, 156, **156**, 168
thewall to tune, 157–158, 159–160
threads in, 162
topas to monitor, 148, 149, 167
Transmission Control Protocol (TCP) and, 135–136, 164
trcstop to stop trace in, 146, **146**, 152
tuning of, 157–165, 157
udp_recevspace/udp_sendspace parameters in tuning, 158, 159
use_isno parameter in tuning, 161, **161**
User Datagram Protocol (UDP) and, 135–136, 164
virtual I/O servers (VIOs), 141, 168, 169
Virtual Memory Manager (VMM) and, 141, 162, 169
nfs, network I/O monitoring using, 148
nfs_rfc1323 in tuning network I/O, 164, **164**
nfs4cl, network I/O monitoring using, 148, 151–152, **152**, 167
network I/O monitoring using, 151–152, **152**, 151
nfsd, network I/O tuning using, 137–138, 165
nfso
AIX 6.1 and, 175, 176
network I/O tuning using 164–165, **164**, **165**, 168
nfsstat, network I/O monitoring using, 148, 149–151, **150**, **151**, 167
nice, 5, 55
CPU tuning using, 46, **46**, 192
Oracle and, 192
nmon, 4, 55, 56, 67
CPU monitoring using, 36–37
disk I/O monitoring using, 107, 110–111, **110**, 192
historical analysis using, 37–38, **37**
Linux on Power (LoP) monitoring using, 199
memory monitoring using, 81, 92
network I/O monitoring using, 148–149, **148**, 167
no
AIX 6.1 and, 175, 176
network I/O tuning using, 157–161, **157**, **159**, **160**, **161**, 164, **164**, 168, 182
