<b>About the Authors</b>	<b>v</b>
<b>Acknowledgments</b>	<b>vii</b>
<b>Foreword</b>	<b>xix</b>
<b>1: IBM DB2 10.1 Certification</b>	<b>1</b>
DB2 10.1 Certification Roles	1
DB2 10.1 Certification Tracks	2
The Certification Process	9
Taking an IBM Certification Exam	12
<b>2: DB2 Server Management</b>	<b>23</b>
Exam Objectives	23
Working with Instances	24
Configuring the DB2 System Environment	34
Configuring DB2 Instances and Databases	41
DB2 Autonomic Computing Features	76
Automatic Storage	84
Data Compression	88
Automatic Database Maintenance	89
The Configuration Advisor	99
Adaptive Utility Throttling	103
Taking Control of a DB2 Server	106
Working with IBM Data Studio	110

Connecting to Instances and Databases	111
Generating Data Definition Language Scripts	114
Performing Database Administration Tasks	114
Performing Database Development Tasks	115
Scheduling Database Jobs	116
Analyzing SQL Queries	123
Chapter Summary	127
Practice Questions	128
Answers	146
<b>3: Physical Design</b>	<b>161</b>
Exam Objectives	161
Servers, Instances, and Databases	162
DB2 Database Objects	162
Creating a DB2 Database	163
A Complete CREATE DATABASE Command	170
Design Aspects of Databases	175
Buffer Pools	178
Table Spaces	182
Reclaimable Storage	200
Storage Groups	205
Schemas	209
Range Clustering and Range Partitioning Tables	213
Range Clustered Tables	213
Range Partitioned Tables	215
Multi-temperature Storage	222
Time Travel Query Using Temporal Tables	231
Utilities, Tools, and File Type Modifiers	239
Restrictions for System-Period Temporal Tables	240
Application-Period Temporal Tables	241
Bitemporal Period Tables	246
Working with XML Data	251
Data Compression	262
DB2 9.7—Increasing the Compression Landscape	269
Chapter Summary	273
Practice Questions	274
Answers	294

<b>4: Business Rules Implementation</b>	<b>307</b>
Exam Objectives	307
Business Rules	308
Not Null Constraints	308
Default Constraints	310
Check Constraints	313
Unique Constraints	316
Referential Integrity Constraints	320
Informational Constraints	337
The Set Integrity Command	339
Creating Tables and Constraints	344
Creating Views with the Check Option	351
Creating and Using Triggers	358
Chapter Summary	370
Practice Questions	371
Answers	382
 <b>5: Monitoring DB2 Activity</b>	 <b>389</b>
Exam Objectives	389
The Database System Monitor	390
The Snapshot Monitor	391
Table Functions for Monitoring	405
Functions Quick Reference	429
Administrative Views for Monitoring	430
Buffer Pool Hit Ratio and I/O Response Time	431
Currently Running Expensive SQL Statement	432
Current Lock-wait Chains in the Database	433
Understanding Your Table Spaces	434
Getting to Know Your Database Server	435
Event Monitors	437
Event Types and Examples	444
Reading Unformatted Event Data	467
Unformatted Event Data Format Table Functions	475
Analyzing SQL with the Explain Facility	489
The Explain Tables	490
Collecting Explain Data	491
Evaluating Explain Data	496
DB2 Troubleshooting Tools	512

Obtaining Information About an Error Code	513
Reason Codes	514
The db2diag Utility	515
First Occurrence Data Capture (FODC)	516
The DB2 Diagnostic Log File	522
The Administration Notification Log	523
Controlling How Much Information Is Collected	523
Interpreting the Notification and Diagnostic Log Entries	524
The db2pdcfg Command	526
The db2bfd Command	530
The db2val Command	532
The db2mtrk Command	535
The db2pd Command	538
The db2top Command	543
The db2trc Command	547
The inspect Command	550
The db2dart Command	552
The db2support Tool	554
Chapter Summary	554
Practice Questions	555
Answers	563
<b>6: DB2 Utilities</b>	<b>569</b>
Exam Objectives	569
Data Movement Utilities and File Formats	570
Data Movement File Formats	570
Extracting Columnar Data from External Files	574
The DB2 Export Utility	576
The DB2 Import Utility	584
The DB2 Load Utility	611
The Four Phases of a Load Operation	614
Performing a Load Operation	615
Loading XML Data	630
Loading from a CURSOR	631
Loading from a Pipe	632
A Nonrecoverable Load Operation	633
Monitoring a Load Operation	634
The Set Integrity Command	636

The DB2 Ingest Utility	638
Formatting the Input Values	643
Ingesting Data from a Pipe	646
DML Operations	647
DB2 Ingest Parameters	651
Handling Ingest Data Problems	652
Recovering a Failed Ingest Command	655
Monitoring Ingest Operations	658
Ingest Performance Tuning Tips	659
Comparison Between Ingest, Load, and Import Utilities	660
Ingest Utility Limitations	660
Other DB2 Data Movement Options	661
Relocate a Database by Using db2relocatedb	674
The db2move and db2look Commands	679
Database Maintenance Utilities	680
The REORGCHK Utility	680
The REORG Utility	681
The RUNSTATS Utility	684
The Rebind Utility	686
Flushing the Package Cache	687
Performance-related Utilities	688
The db2batch Utility	688
The DB2 Design Advisor	692
Chapter Summary	699
Practice Questions	700
Answers	710
<b>7: High Availability</b>	<b>719</b>
Exam Objectives	719
Transactions	720
Transaction Logging	723
Transaction Logging Strategies	725
Other Logging Considerations	728
Controlling How “Disk Full” Errors Are Handled	729
Database Recovery Concepts	730
Recoverable and Nonrecoverable Databases	733
Online Versus Offline Backup and Recovery	734
Incremental and Delta Backup and Recovery	734

Performing a Crash Recovery Operation	736
Backup and Recovery	739
Rebuilding Invalid Indexes	771
Backing Up a Database with Split Mirroring	772
Initializing a Split Mirror with db2inidb	775
High Availability Disaster Recovery (HADR)	776
Requirements for HADR Environments	777
Read on Standby Feature	779
Read On Standby Restrictions	781
HADR Multiple Standbys	782
Setting Up an HADR Multiple Standby Environment	783
Load Operations and HADR	789
DB2 pureScale—An Overview	791
Working with a pureScale Cluster	794
Chapter Summary	797
Practice Questions	798
Answers	815
<b>8: DB2 Security</b>	<b>825</b>
Exam Objectives	825
Controlling Database Access	826
Authentication	826
Where Does Authentication Occur?	826
Security Plug-ins	829
Trusted and Untrusted Clients	830
Authorities and Privileges	831
Authorities	832
Privileges	841
Granting Authorities and Privileges	851
Granting Authorities and Privileges from IBM Data Studio	852
Granting Authorities and Privileges with the GRANT command	853
GRANT SQL Statement Examples	860
Revoking Authorities and Privileges with the REVOKE SQL Statement	861
REVOKE SQL Statement Examples	868
Requirements for Granting and Revoking Authorities and Privileges	869
Authorities and Privileges Needed to Perform Common Tasks	870
Role-based Access Control	872
A Comparison Between Roles and Groups	873

---

Trusted Contexts and Trusted Connections	879
Securing Data with Label-based Access Control	883
Implementing Row-level LBAC	883
Defining a Security-label Component	884
Defining a Security Policy	885
Defining Security Labels	886
Creating a LBAC-Protected Table	888
Granting Security Labels to Users	889
Putting Row-level LBAC into Action	890
Implementing Column-level LBAC	892
Defining a Security-label Component	892
Defining a Security Policy	893
Defining Security Labels	893
Creating an LBAC-Protected Table	893
Granting Security Labels to Users	894
Creating LBAC-Protected Columns	895
LBAC Rule Set—DB2LBACRULES	896
LBAC Rule Exemptions	897
Putting Column-level LBAC into Action	898
Combining Row-level and Column-level LBAC	899
Row and Column Access Control	901
Implementing Row Permissions	901
Understanding the DML Behavior Under RCAC	906
Deactivating the Row Access Control	907
Creating Column Masks	907
Built-in Scalar Functions	911
Advantages of Using RCAC	911
The DB2 Audit Facility	912
db2audit Tool Command	913
AUDIT SQL Statements	916
Chapter Summary	919
Practice Questions	920
Answers	929
<b>9: Connectivity and Networking</b>	<b>937</b>
Exam Objectives	937
Configuring Communications	937
Manually Configuring DB2 Server Communications	939

DB2 Directory Files	942
Cataloging Remote Servers and Databases	946
Cataloging a DB2 Database	946
Cataloging a Remote DB2 Node (Server)	950
Cataloging a DCS Database	953
Binding Utilities and Applications	954
Configuring Communications to System z and System i	957
DB2 Discovery	957
Fast Communications Manager (FCM)	962
Configuring LDAP Connections	965
Registering the DB2 Server with LDAP	966
Registering the DB2 Database with LDAP	968
Deregistering the DB2 Server from LDAP	968
Deregistering the DB2 Database from LDAP	968
Troubleshooting Communications Errors	969
Chapter Summary	970
Practice Questions	971
Answers	977
<b>10: DB2 10.5 Exam Crash Course</b>	<b>985</b>
Exam Objectives	985
DB2 Server Management	986
The pureScale Model	997
Managing Access to the Database Server	1005
Groups, Roles, User IDs	1006
BLU Technology	1008
Deep Dive into BLU	1021
Separate Row and Column Instances on a Database Server	1023
BLU Social	1031
Physical Design	1031
JSON	1046
Configuring the Database	1047
Managing JSON	1049
Working with Data Studio V4.1.1	1049
Configuring a DB2 Database	1050
Tuning SQL	1059
Workload Management	1068
Changing a Database's Code Set	1072

Using Export	1073
Shadow Tables	1074
Deploying Shadow Tables	1075
Utilities: Converting Row Tables to Column	1105
Reclaiming Deleted Space in Column-Organized Tables	1106
PureScale	1107
Backup and Restore Enhancements	1122
Supporting Multiple Databases in pureScale	1131
CF Self-Tuning Memory Feature	1131
Monitoring DB2 Activity	1132
Connectivity and Networking	1141
High Availability	1145
The “Oops” Recovery Factor	1146
Chapter Summary	1147
Practice Questions	1148
Answers	1161
<b>11: DB2 10.1/10.5 Question Bank</b>	<b>1165</b>
Practice Questions	1165
Answers	1194
<b>Appendix A: DSFA Guidelines</b>	<b>1213</b>
<b>Appendix B: Resources</b>	<b>1227</b>
