Introduction        xiii
   About This Book   xiv
   Audience         xvi
   Conventions Used xvii
      Example 1      xvii
      Example 2      xvii

1: IBM DB2 for Linux, UNIX, and Windows Certification     1
   DB2 10.1 and 10.5 for LUW Certification Roles        2
      IBM Certified Database Associate—DB2 10.1 Fundamentals 2
      IBM Certified Database Associate—DB2 10.5 Fundamentals for LUW 4
      IBM Certified Database Administrator—DB2 10.1 DBA for Linux, UNIX, and Windows 6
      IBM Certified Database Administrator—DB2 10.5 DBA for LUW Upgrade from DB2 10.1 9
      IBM Certified Advanced Database Administrator—DB2 10.1 for Linux, UNIX, and Windows 12
   Additional DB2 9.7 Certification Roles              14
      IBM Certified Application Developer—DB2 9.7 for Linux, UNIX, and Windows 14
      IBM Certified Solution Developer—DB2 9.7 SQL Procedure 16
   The Certification Process                          18
      Preparing for the Certification Exams             18
      Arranging to Take a Certification Exam           20
      Taking an IBM Certification Exam                 22
2: Planning

The DB2 Family

- DB2 Express-C
- DB2 Express Server Edition
- DB2 Workgroup Server Edition (WSE)
- DB2 Enterprise Server Edition (ESE)
- DB2 Advanced Workgroup Server Edition (AWSE)
- DB2 Advanced Enterprise Server Edition (AESE)
- DB2 for z/OS

Other DB2 Add-on Products

- IBM DB2 BLU Acceleration In-Memory Offering
- IBM DB2 Business Application Continuity Offering
- IBM DB2 Encryption Offering
- IBM Advanced Recovery Feature
- IBM DB2 Performance Management Offering

Database Workloads

- Optimized Solutions for Each Workload Type

DB2 10.5 with BLU Acceleration

- BLU Acceleration Design Principles
- When to Use BLU Acceleration

DB2 10.5 Compatibility Features

- Enabling One or More Optional Compatibility Features

3: Security

Controlling Database Access

Authentication

- Where Authentication Takes Place

Authorities and Privileges

- Administrative Authorities
- Privileges

Granting Authorities and Privileges

- The GRANT Statement
- GRANT Statement Examples

Revoking Authorities and Privileges

- REVOKE Statement Examples

Row and Column Access Control (RCAC)
Row Permissions .......................... 98
Column Masks .......................... 100
Activating Row and Column Access Control .......................... 102
Label-Based Access Control (LBAC) .......................... 102
Security Label Components .......................... 103
Security Policies .......................... 104
Security Labels .......................... 105
Granting Security Labels to Users .......................... 107
Implementing Row-Level LBAC Protection .......................... 108
Implementing Column-Level LBAC Protection .......................... 108
A Word About Trusted Contexts .......................... 109
Creating Trusted Contexts .......................... 111
A Word About DB2 Native Encryption .......................... 112

4: Working with Databases and Database Objects .......................... 115
Servers, Instances, and Databases .......................... 116
Other DB2 Objects .......................... 117
Data Objects .......................... 117
System Objects .......................... 131
Creating a DB2 Database .......................... 136
DB2’s Directory Files .......................... 140
The System Database Directory .......................... 140
The Local Database Directory .......................... 141
The Node Directory .......................... 141
The Database Connection Services (DCS) Directory .......................... 142
Cataloging and Uncataloging a DB2 Database .......................... 142
Cataloging and Uncataloging a Node .......................... 145
Cataloging and Uncataloging a DCS Database .......................... 147
Establishing a Database Connection .......................... 148
Type 1 and Type 2 Connections .......................... 150
Tables Revisited .......................... 151
Base Tables .......................... 152
Synopsis Tables .......................... 152
Partitioned Tables .......................... 152
Range-Clustered Tables (RCTs) .......................... 154
Multidimensional Clustering (MDC) Tables .......................... 154
Contents

Insert Time Clustering (ITC) Tables 158
Materialized Query Tables (MQTs) 158
Shadow Tables 159
Temporal (Time-Travel) Tables 159
History Tables 161
Temporary Tables 161
Typed Tables 162
A Word About Compression 162

5: Working with DB2 Data Using SQL and XQuery 165
Structured Query Language (SQL) 166
SQL Data Manipulation Language (DML) Statements 167
The INSERT Statement 167
The UPDATE Statement 170
The DELETE Statement 174
The SELECT Statement 177
A Closer Look at the SELECT Statement and Its Clauses 178
Other SELECT Statement Clauses 183
The WHERE Clause 183
The GROUP BY Clause 194
The GROUP BY ROLLUP Clause 196
The GROUP BY CUBE Clause 197
The HAVING Clause 199
The ORDER BY Clause 200
The FETCH FIRST Clause 202
The Isolation Clause 204
A Word About Common Table Expressions 205
A Word About CASE Expressions 207
Joining Tables 211
Using a Set Operator to Combine the Results of Two or More Queries 223
Using a Cursor to Obtain Results from a Result Data Set 231
A Word About Working with Temporal (Time-Travel) Tables 232
Querying System-Period Temporal Tables 234
Querying Application-Period Temporal Tables 236
Querying Bitemporal Temporal Tables 237
Working with XML Data 237
Working with User-Defined Functions (UDFs)  243
  Creating SQL Scalar and SQL Table User-Defined Functions  244
  Invoking SQL Scalar and SQL Table User-Defined Functions  248
Working with Stored Procedures  249
  Developing and Registering SQL Stored Procedures  250
  Calling a Stored Procedure  253
Transactions and Transaction Boundaries  256
  Transaction Management with Savepoints  260
A Word about DB2 10.5’s SQL Compatibility Enhancements  263
  Extended Row Size Support  264
  Ability to Exclude NULL Index Keys  265
  String Unit Attributes Improve Handling of Multibyte Characters  265

6: Working with DB2 Tables, Views, and Indexes  267
DB2’s Data Types  268
  Numeric Data Types  268
  Character String Data Types  270
  Date and Time Data Types  272
  Large Object Data Types  274
  The Extensible Markup Language (XML) Data Type  275
  A Word About the Oracle Compatibility Data Types  276
  User-Defined Data Types  277
Understanding Data Constraints  277
  NOT NULL Constraints  278
  Default Constraints  278
  UNIQUE Constraints  280
  Check Constraints  282
  Referential Integrity Constraints  283
  Informational Constraints  301
Creating Tables  303
  Creating Tables with Identity Columns  310
  Creating Tables That Are Similar to Existing Tables  313
  A Quick Reminder About Schemas  314
  Examples of the CREATE TABLE Statement  315
Altering Tables  321
A Closer Look at Temporary Tables  324
A Closer Look at Views 327
A Closer Look at Indexes 332
Altering Indexes 336
A Closer Look at Triggers 337

7: Data Concurrency 345
Understanding Data Consistency 346
Transactions, Isolation Levels, and Locks 347
  Isolation Levels 348
  Choosing the Proper Isolation Level 358
  Specifying the Isolation Level to Use 358
  Locks 360
  Lock Attributes and Lock States 361
  How Locks Are Acquired 364
  Which Locks Are Acquired? 366
  Lock Avoidance 367
  Currently Committed Semantics 368
  Enabling Currently Committed Semantics Behavior 372
  Overriding Currently Committed Semantics Behavior 372
  Locks and Performance 373

Appendix A: DB2 10.5 Fundamentals for LUW Exam (Exam 615) Objectives 381
Appendix B: Practice Questions 384
Appendix C: Answers to Practice Questions 436
Index 482
