Index

A

abstract description of Web services, 49
accessing database, authentication values for, 178-179
admin console, WebSphere Application Server, 52-53, **53**, **54**
  binding settings using, 55, **56**
  installing a Web service using, 54-58, **55**-**59**
  logging in and out of, 59
  Master Configuration Web service settings in, 57, **58**
  reviewing installation settings for, 56, **57**
  stopping, 59
alias, Java Authentication and Authorization Service (JAAS) and, 173
alias and naming, digital signatures, 298
authentication, 274
  Java Authentication and Authorization Service (JAAS) and, 173

B

beans, 21
BindingPoint, 106
bindings for Web Services, 47-50, 92, **92**, 128
  digital signature for, request vs. response, 299
body, 3
brokers. See service brokers
business registries, xviii. See also Universal Description, Discovery, and Integration (UDDI)

C

Certificate Authorities (CAs), 275-276
check box added to form, 203, **203**, 206, **206**
client keystore, 289-290, **292**
client proxy, 4, 234-235, **235**
  creation of, 27-31, 27
  discovering Web services and, creation of, 94-95, 103-106
  environment configuration for, 29, **30**
  JavaServer Faces (JSF) and, 223
  JavaServer Page (JSP) logic for, 31-36, **32**, **33**, 34-**35**
  Page Designer and, 31-36, **32**, **33**, 34-**35**
  type of proxy, selection of, 28-29, **28**
  using, in Web application, 31-36
  Web service selection and URI for, 29, **29**
collection classes, JavaServer Faces (JSF) and, 220-221, **221**
columns, database, 137, 144-146, 145, 145*t*, **146**
concrete bindings for Web services, 49
connecting to a database, 139-142, **139**, **141**, **142**, 148-149
Console tab, 18
constructor, 218, **218**, 252
controllers, 189, 214
controls, 255, **255**, **256**, 260, **261**
cryptography, 275. See also encryption

D

Data Definition view, 138-139
data objects added to Web page, 223-230, **224**-**230**
Data perspective, 138
data pooling, 159
data source, 171-175, **172**, **173**, **174**, **175**
Database Explorer view, 138-139
databases, 135-211
  accessing of, authentication values for, 178-179
  Cloudscape, 139-140
  columns in, 137, 144-146, 145, 145*t*, **146**
  connection to, creation of, 139-142, **139**, **141**, **142**, 148-149
  creating, 138-143
  Data Definition view in, 138-139
  Data perspective for, 138
  data pooling in, 159
  data source definition for, 171-175, **172**, **173**, **174**, **175**

Database Explorer view in, 138-139
disconnecting from, and reconnecting to, 142, 162
fields in, 137
foreign key in, 137
help for, 140
host variables in, 152
introduction to, 136-138
Java Authentication and Authorization Service (JAAS) and, 173
Java Naming and Directory Interface (JNDI) in, 159, 177-178, **178**
JavaBeans generated from SQL in
accessing of, authentication values for, 178-179
data source definition for, 171-175, **172**, **173**, **174**, **175**
error handling in, 185-186, **185**
examining the generated beans in, 165-171, **165-166**
resource reference definition for, 175-179, **176**, **177**, **178**
servlets and, 164
SOAP request/response and, 186-187, **186**
Subscribe class in, 182, **182-183**
SubscribeRow class in, 181, **181-182**
SubscribeSelect bean in, **168-169**
SubscribeSelectRow bean in, 169, **170**
SubscribeUpdate bean in, **167-168**
Web service creation using, 164-188, **164**
Web service wizard and, 184-187, **185**
WSDL file and, 187-188, **188**
JDBC and, 136, 139-140, **139**
keys in, 137
model-view-controller (MVC) architecture in, 189
ODBC and, 136
primary key in, 137
Register Web page application developed using, 188-210
check box added to form in, 203, **203**, 206, **206**
creating Register Web page for, 197-201, **198**, **199**, **200**, **201**
deployment descriptor and, 195-197, **196**, **197**
finished form in, 209, **209**
hidden field in forms for, 205-207, **205**
Insert Web page in, 201-204, **204**
InsertServlet servlet in, 193, **193-194**
link to Web page in, 199-200, **199**
Row Not Found Exception class and, 190
running, 209-210
SelectServlet servlet in, **191-192**
servlet classes in, 190-197, **191-197**
servlets for form action in, 200, **200**
setting up project for, 189-190
Thanks Web page in, 208, **208**
Update Web page in, 204-207, **207**
UpdateServlet servlet in, 193, **194-195**
relational type, 136
relationships between tables of, 137
resource reference definition for, 175-179, **176**, **177**, **178**
rows in, 137
sample of, 137, **138**
schemas, folders, and files created for, 142, **143**
solution files for, 136
SQL and, 137, 149-157
Insert statement in, 149-152, **149**, **150**, **151**, **152**
JavaBeans generated from, 157-161, **158**, **160**
SELECT statement in, 155-157, **156**, **157**
SET clause in, 155, **155**
Update statement in, 153-155, **153**, **154**, **155**
WHERE clause in, 154-155, **154**, 156-157, **157**
table definition deployment to create, 146-147, **146**, **147**
tables in, 137, 143-149
deploying and publishing the Web services, 41-77
administrative console startup for, 52-53, **53**, **54**
application servers and, deploying to, 52-62
bindings set for, 55, **56**
exporting the EAR file in preparation for, 51-52, **51**
installing Web service on Application Server in, 54-58, **55-59**
Master Configuration settings for, 57, **58**
NAICS categories for Web services and, 70, **71**
preparing the Web service for, 45-52
reviewing installation settings for, 56, **57**
running the Web application for, 60-62, **62**
service-oriented architectures for, 63-64, **63**
simple vs. advanced publication formats for, 68, 69
stopping administrative console after, 59
UDDI registries for, 64-65
UDDI Test Registry (IBM) for, 65-73
Universal Description, Discovery, and Integration (UDDI) for, 62
updating the WSDL file in preparation for, 46-51, **47**
Web Services Explorer for, 65-73
Web Services Inspection Language (WSIL) and, 64, 73-77
WebSphere Application Server startup for, 52
Deployment Descriptor Editor, security and, to define options for, 293
deployment descriptor, 195-197, **196**, **197**
digital certificates, 275-276, 284-292, **292**
client keystore for, 289-290, **292**
distinguished name for, 288
IBM Key Management Tool for, 284-285, **285**
importing signer certificates for, 290-292, **290**, **291**
self-signed, 287-289, **288**
server keystore setup for, 286-289, **286**, **287**, **292**
digital signatures, 275, 276-278, 292-317

alias and naming in, 298
bindings for, request vs. response, 299
client application security configuration and, updating for, 322-326
key locator and key information for, 299-301, **300**, **301**, 311-312, **311**, **312**, 320-321, 324-325
sample signed Web service request using, **316**-**317**
sample signed Web service response using, **327**-**329**
signing a Web service response using, 318-329
signing information configuration for, 301-304, **302**, **303**, **304**, 313-315, **314**, 321-322, 325-326
testing, 315-317, 326-329
token consumer configuration for, 309-310, **310**, 324
token generator configuration for, 296-298, **298**, 319-320
transforms to sign message body in, 303-304, **304**
trust anchor configuration for, 307-308, **308**, 323
updating Web service with, 304-315
Web service security configuration and, updating for, 318-322
what was signed, identification of, 305-307, **306**, **307**
what will be signed, identification of, 294-296, **295**, **296**, 318-319
disconnecting from the database, 142, 162
discovering Web services, 2, 79-106, 79
binding details for, 92, **92**
client proxy creation for, 94-95, 103-106
HTML forms in, 81-84, **82**, **83**, **84**
JavaServer Page (JSP) logic for, 95-97, **96**
public Web services, discovering and using, 101-106
service requestors in, 80
StockPriceLookup Application, 80-81, **80**, **96**-**97**
binding details for, 92, **92**
client proxy creation for, 94-95
JavaServer Page (JSP) for, 81-82
running, 97-98, **98**
solution file for, 98-99
static content in, 81
testing, 91-93, **92**, **93**
terms of use agreements for, 101
testing Web service in, 91-93, **92**, **93**
UDDI registry use for, 80, 85-91, 101-106
"unreachable service" message and, 90, 91
URL for, 92
Web Services Inspection Language (WSIL) and, 99-100, **100**
Web Services Interoperability (WS-I) standards and, 104-105
WSDL file access for, 102-103
distinguished name, 288
dynamic Web project, 11

E

encryption, 274, 275, 331-358
client application security configuration for, updating, 334-339, 352-354
encryption information, configuration of, 338-339, **339**, 343-344, **344**, 351-352, 353-354
key locator and key information for, 335-338, **336**, **337**, 341-343, **342**, **343**, 349-351, **350**, **351**, 352-353
sample Web service request using, **346**-**348**, **355**-**357**
TCP/IP Monitor and, 332, 345-348
testing Web service request using, 345-348, 354-357
Web service and client application setup for, 332
Web service request using, 333-348
Web service response using, 348-357
Web service security configuration for, updating, 339-344, 348-352
what was encrypted, identification of, 339-340, **340**, 352
what will be encrypted, identification of, 334-335, **335**, 348-349
XML encryption in, 333
endpoint address for Web service, 46, 60, **61**, 113
Enterprise Application (EAR), 11
Enterprise Archive (EAR) files, 13
exporting, in preparation for Web service deployment, 51-52, **51**
envelope, 3
error handling, 107-134
adding error-checking to Web applications and, 116-122, **118**, **119**, **120**, **121**
databases and, 185-186, **185**
HTTP traffic monitoring in, 108-116
ImprovedStockQuote Web service example for, 124-131
binding details in, 128
creating Web service for, 126-131
setting up Web project for, 124-126, **124**-**126**
SOAP request and response messages in, 129-130, **129**, **130**, **131**
status pane for errors in, 128-129, **129**
updating, 131-133, **132**, **133**
JavaServer Faces (JSF) and, 239-240, **239**, 243, **243**
status pane for errors in, 128-129, **129**
stopping the servers in, 121-122, **122**
TCP/IP Monitor and, 108
endpoint address for, 113
HTTP traffic monitoring in, 108-116
running Web application using, 114-116, **114**, **115**
server configuration for, 110-111, **110**, **111**
setting up, 111-112, **112**
SOAP request and response message with, 115-116, **115**

stopping, 121-122, **122**
updating Web application to include, 113, **113**
validation page for, 239-240, **239**, **240**
Web Services Explorer Test Facility for, 108
event handlers, 257-258, 257-**258**, 262, **262**, 264-265, **265**
JavaServer Faces (JSF) and, 240-241, **241**
event listeners, 215
expressions, 21, 33

F

fields, database, 137
file creation, 19
finance.yahoo.com, 17
firewalls and Web applications, 37
folder structure for projects in Rational Developer, 13
foreign key, in databases, 137
forms, HTML, 81-84, **82**, **83**, **84**
check box added to, 203, **203**, 206, **206**
fields added to, 83, **83**
hidden field in, 205-207, **205**
input field in, 256-257, **256**
labeling Submit button in, 237, **237**
servlets for action in, 200, **200**
Submit button added to, 83-84, **84**

G

getter and setter methods, 218, **219**
Grand Central Communications, 106
grid component added to page, JavaServer Faces (JSF) and, 231-232, **232**

H

hash or message digest, 277
header, 3
HTTP, 109-110
Hello Web service example of security features, 279-284, **279**
creating Web service and client application in, 279-281, **279**, **281**
SOAP request and response messages in, 283-284, **283**
TCP/IP Monitor and, 280-281
hidden field in forms, 205-207, **205**
host variables, in databases, 152
HTML, 21
forms for, 81-84, **82**, **83**, **84**
JavaServer Faces (JSF) and, 214
previewing results of, Preview tab and, 24
viewing, Source tab and, 24
HTTP, 3
headers for, 109-110
port numbers for, 49-50
Secure Sockets Layer (SSL) and, 274-275
traffic monitoring in, using TCP/IP Monitor, 108-116

I

IBM, xviii
IBM Key Management Tool, 284-285, **285**
IBM Microsoft, 64
implicit objects, JavaServer Page (JSP), 96
importing Web service classes, for database, 179-183, **180**, **181-182**
ImprovedStockQuote Web service example, 124-131, **124-126**
binding details in, 128
creating Web service for, 126-131
setting up Web project for, 124-126, **124-126**
SOAP request and response messages in, 129-130, **129**, **130**, **131**
status pane for errors in, 128-129, **129**
updating, 131-133, **132**, **133**
input field in Register page, 256-257, **256**
Insert statement, SQL, 149-152, **149**, **150**, **151**, **152**
Insert Web page, 201-204, **204**
InsertServlet servlet, 193, **193-194**
integrity checking, 274
International Telecommunications Union (ITU), security specifications of, 276

J

J2EE, xviii, xix, 13
Java, xix, 2
importing source for Web service creation, 14-17, **15**, 16-**17**
JavaServer Faces (JSF) and, 214
Java Authentication and Authorization Service (JAAS), 173
Java Database Connectivity, 136. See also JDBC
Java Naming and Directory Interface (JNDI), 159, 177-178, **178**
JavaBeans, xix
managed beans in, 215, 252-253, **253**, 259, **259**
scope of beans and, 215
SQL to generate, 157-161, **158**, **160**
generated from SQL, 164-188, **164**
accessing of, authentication values for, 178-179
data source definition for, 171-175, **172**, **173**, **174**, **175**
error handling in, 185-186, **185**
examining the generated beans in, 165-171, **165-166**

importing Web service classes in, 179-183, **180**, **181**-**182**
information on, using Rational Developer Help for, 170
Java Authentication and Authorization Service (JAAS) and, 173
Java Naming and Directory Interface (JNDI) in, 177-178, **178**
resource reference definition for, 175-179, **176**, **177**, **178**
servlets and, 164
SOAP request/response and, 186-187, **186**
Subscribe class in, 182, **182**-**183**
SubscribeRow class in, 181, **181**-**182**
SubscribeSelect bean in, **168**-**169**
SubscribeSelectRow bean in, 169, **170**
SubscribeUpdate bean in, **167**-**168**
Web service wizard and, 184-187
WSDL file and, 187-188, **188**
